

We are students of BML Munjal University, Haryana currently pursuing B.Tech 3<sup>rd</sup> year. This is our trail on leveraging the power of technology to help Man-Kind in need. The big-picture of this app is to make it an integrated application to help everyone of us handling any epidemic in future. (Current target – COVID 19).

Helping government in making a plan of lock-downs and necessary precautions. And making users aware of current situation with updates and caution them with necessary precautions.

Any suggestions and Improvements would be highly appreciated.

Please mail your suggestions at [epidemic.handler@gmail.com](mailto:epidemic.handler@gmail.com)
